General Syllabus

CSCE 12103 Enterprise Computing

Credit Hours: 3

Lecture Hours: 3

Laboratory Hours: 0

Prerequisite: None

Effective Catalog: 2020-2021

I. Course Information

A. Catalog Description

Introduces concepts in modern enterprise systems. Topics for this course include enterprise servers and mainframe computing, operating systems, database systems, file systems and storage, security, availability, scalable computing, and enterprise programming languages (COBOL, JCL, etc.).

II. Student Learning Outcomes

A. Subject Matter

Upon successful completion of this course, the student will be able to:

1. Describe enterprise computing architecture and environments.
2. Design applications using enterprise computing programming languages.
3. Explain the concepts of availability and scalable computing in an enterprise environment.
4. Describe enterprise computing operating systems and data storage facilities.

B. University Learning Outcomes

This course enhances student abilities in the following areas:

Analytical Skills

Critical Thinking Skills

Students will identify a problem, break it down into its components and design a solution.

III. Major Course Topics

- A.** Enterprise Computing Concepts
- B.** Operating Systems
- C.** Database Systems
- D.** SQL
- E.** z/OS
- F.** JCL
- G.** VSAM
- H.** COBOL
- I.** Linux
- J.** Security
- K.** Availability
- L.** Scalability
